

New England-Canada Business Council

Welcomes

Steven N. Liss, PhD

*Speaking on "Canada-U.S. Collaborations: Why now? And who cares?"
A Perspective from Queen's University, Ontario, Canada*

Dr. Steven Liss is the Vice-Principal (Research) at Queen's University (Est. 1841), one of Canada's oldest degree-granting institutions and home to the co-recipient of the 2015 Nobel Prize in Physics and 2016 Breakthrough Prize, Dr. Arthur McDonald. Dr. Liss' talk will focus on the critical importance of international and cross-border collaboration in advancing research which can have significant societal benefit and impact. The development of a recent partnership in the area of environmental and clean technologies will be highlighted.

Thursday, May 19, 2016
